PallCortège™

Exterior: 212" L, 80" W, 132.25" H

Funerary art is any creative expression, monument, or object created to memorialize the dead, decorate a burial site, or facilitate the journey into the afterlife. It serves as a visual language for grief, preserving cultural values, and connecting the living with the departed loved and honored.

The PallCortège™ transports the PallBier™ (both space-frame chassis) is a compact, serial hybrid electric with range extender (REX), all-wheel-drive (AWD), catamaran-style Na-ion skateboard battery pack encapsulating an integrated overhead straddle crane that securely holds and decants the aforementioned PallBier™ with its casket and flowers.

The concept is inspired in part by the *straddle carrier* or *straddle truck*, a once common freight-carrying vehicle that carried its load underneath by "straddling", rather than carrying it on top of a bed like a conventional truck.

Interior Gantry

160" L, 60" W, 100" H
